

ASPEN HORIZON™ 637 LSO

HCPCS: L0637

PRODUCT DESCRIPTION:

The Aspen Horizon line of inelastic braces offers a clinically tested treatment option for patients experiencing muscle fatigue and spasms, which can cause pain. Combining support and targeted compression, Horizon braces provide a non-invasive, non-narcotic option that is designed to help patients regain activities of daily living.

FEATURES:

One Size Adjustable

Pull-through sizing mechanism allows for quick and easy adjustment, without the use of tools. Embroidered size indicators makes it easy to fit and adjust sizes.

Moveable Rigid Side Panels

Provides increased lateral control for patients in need of additional support. Can be moved where needed or removed if additional lateral support is no longer required as the patient recovery progresses.

Targeted Independent Tightening Mechanism

Aspen's patented 4:1 mechanically advantaged SlickTrack™ tightening system independently tightens top and bottom allowing patients to localize compression where they need it to support fatigued muscles that spasm.

Reliable Structural Integrity

Tri band technology system and integrated vertical stays provide stability and maintain structural integrity to help ensure effective compression and flexibility.

Targeted Independent Tightening Mechanism

Aspen's patented 4:1 mechanically advantaged SlickTrack™ tightening system independently tightens top and bottom allowing patients to localize compression where they need it to support fatigued muscles that spasm.
